CONCURRENCY: PRACTICE AND EXPERIENCE, VOL. 7, iii–vii (1995)

Contents of Volume 7

VOLUME 7 NUMBER 1 FEBRUARY 1995

Experiences with networked parallel computing
P. Hoogerbrugge and R. Mirchandaney 1

Dynamic load-balancing for PDE solvers on adaptive unstructured meshes
C. Walshaw and M. Berzins 17

Pipeline optimizations for the prime factor algorithm
R. Albrizio, A. Mazzone, N. Veneziani, G. Aloisio, M. Bochicchio and P. Messina 29

Fault tolerance in the execution of remote jobs on idling workstations
C.-Q. Yang and Y. Qu 43

Evaluation of parallelization strategies for an incremental Delaunay Triangulator in E^3
P. Cignoni, D. Laforenza, C. Montani, R. Perego and R. Scopigno 61

VOLUME 7 NUMBER 2 APRIL 1995

Processing recursive queries on transputers
J. Shao, D.A. Bell and M.E.C. Hull 81

SCIDDLE: A tool for large scale distributed computing
P. Arbenz, C. Sprenger, H.P. Lüthi and S. Vogel 121

Computational Similarity
R.W. Hockney 147

Indexed or abstracted by: Cambridge Scientific Abstracts, CompuMath Citation Index (Institute for Scientific Information (ISI)), Computing Reviews, Engineering Index, INSPEC, Research Alert (ISI) and SCISEARCH Database (ISI).

VOLUME 7 NUMBER 3 MAY 1995

Partitioning and mapping in embedded multiprocessor architectures in the presence of constraints
S. Yalamanchili, L. Te Winkel, D. Perschbacher and B. Shenoy 167

Instructional footprinting and semantic preservation in Linda
K. Landry and J.D. Arthur 191

Partitioning tasks between a pair of interconnected heterogeneous processors: a case study
D.J. Lilja 209

P^3L: a structured high-level parallel language, and its structured support
B. Bacci, M. Danelutto, S. Orlando, S. Pelagatti and M. Vanneschi 225

VOLUME 7 NUMBER 4 JUNE 1995

PARADOX—a heterogeneous machine for the 3D vision algorithm
H. Wang and M. Brady 257

Implementation of a fully balanced periodic tridiagonal solver on a parallel distributed memory architecture
T. M. Eidson and G. Erlebacher 273

Partitioning of unstructured meshes for load balancing
O. C. Martin and S. W. Otto 303

Programming pipelined CAD applications on message-passing architectures
P. Kenyon, S. Seth, P. Agrawal, A. Clematis, G. Dodero and V. Gianuzzi 315

VOLUME 7 NUMBER 5 AUGUST 1995

Editorial:
Resource management of parallel and distributed systems with static scheduling: challenges, solutions and new problems
Ishfaq Ahmad 339

Compile-time scheduling of multithread with data localities on multiple vector processors
C.-Y. Chang and J.-P. Sheu 349

Comparative study of task duplication static scheduling versus clustering and non-clustering techniques
B. Shirazi, H.-B. Chen and J. Marquis 371

A fast recursive mapping algorithm
S. Chen and M. M. Eshaghian 391

Task assignment using a problem-space genetic algorithm
I. Ahmad and M. K. Dhodhi 411

Run-time issues in program partitioning on distributed memory systems
S. Pande and D. P. Agrawal 429

A framework for partitioning parallel computations in heterogeneous environments
J. B. Weismann and A. S. Grimshaw 455

A partitioning advisory system for networked data-parallel processing
P. E. Crandall and M. J. Quinn 479

A compendium of processor allocation strategies for two-dimensional mesh connected systems
B. E. Melhart, C. A. Morgenstern and T. Nute 497

VOLUME 7 NUMBER 6 SEPTEMBER 1995

Distributed implementations of communicating objects
W. Jia and G. Libert 515

The Genesis distributed memory benchmarks. Part 2: COMMS1, TRANS1, FFT1 and QCD2 benchmarks on the SUPRENUM and iPSC/860 computers
A. J. G. Hey, R. Hockney, V. Getov, I. Wolton, J. Merlin and J. Allright 543

Accelerated ray tracing using an nCUBE2 multicomputer
I. J. Grimstead and S. Hurley 571

VOLUME 7 NUMBER 7 OCTOBER 1995

Editorial:
Resource management in parallel and distributed systems with dynamic scheduling: dynamic scheduling
I. Ahmad 587

The dynamic behaviour of parallel programs under process migration
R. Candlin and J. Phillips 591

A parallel dynamic load-balancing algorithm for solution-adaptive finite element meshes on 2D tori
Y.-C. Chung, Y.-J. Yeh and J.-S. Liu 615

Dynamic scheduling techniques for heterogeneous computing systems
B. Hamidzadeh, D.J. Lilja and Y. Atif 633

An adaptive algorithm for resolving processor thrashing in load distribution
C. Lu and S.-M. Lau 653

A load index and a transfer policy for global scheduling tasks with deadlines
N.G. Shivaratri and M. Singhal 671

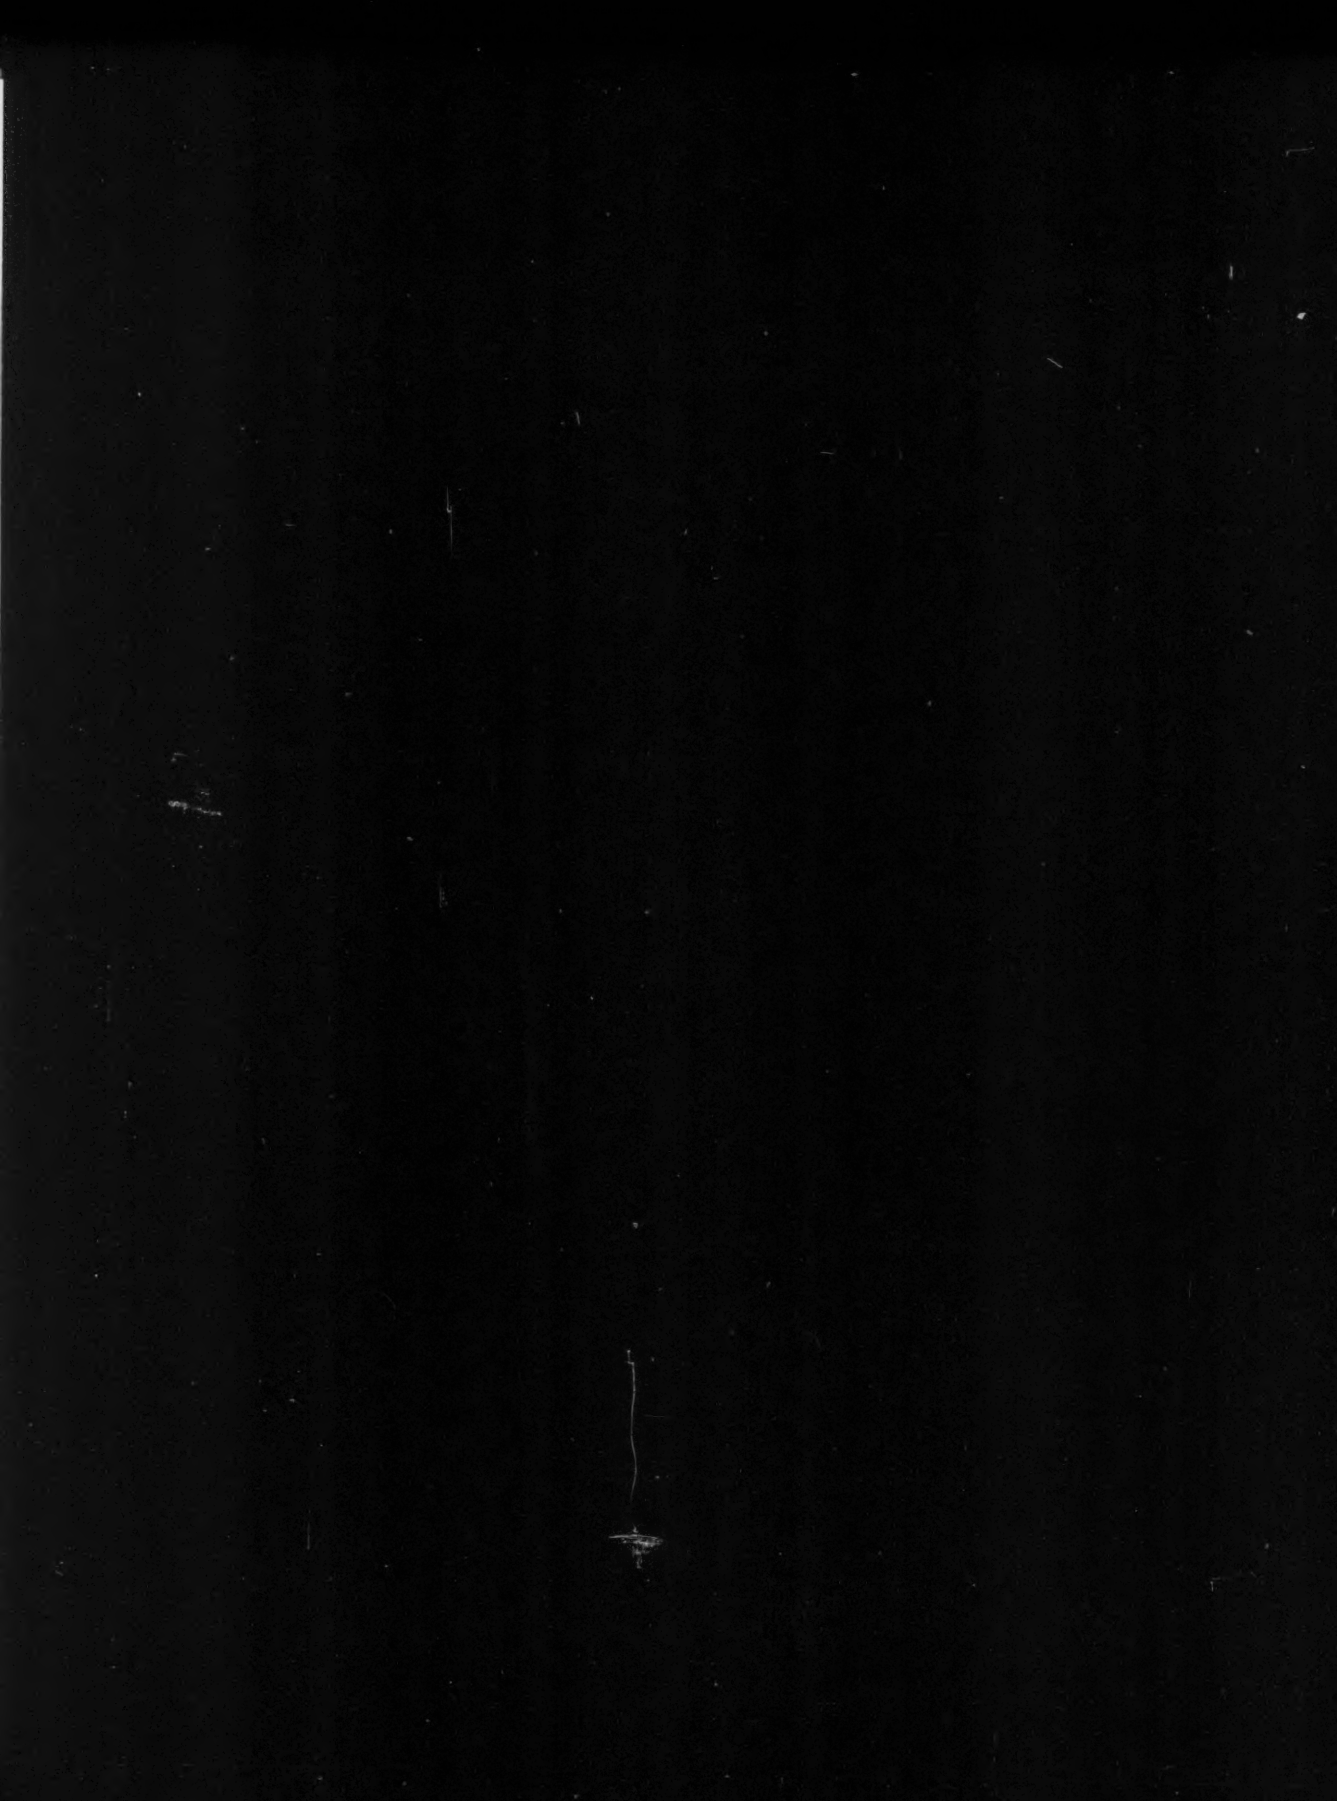
Symmetrical Hopping: a scalable scheduling algorithm for irregular problems
M.-Y. Wu 689

Nearest-neighbor algorithms for load-balancing in parallel computers
C. Xu, B. Monien, R. Lüling and F.C.M. Lau 707

VOLUME 7 NUMBER 8 DECEMBER 1995

Beyond software performance visualization
M. Abrams, T.J. Lee, H.T. Cadiz and K. Ganugapati 737

A toolkit for parallel functional programming
P.H. Hartel, R.F.H. Hofman, K.G. Langendoen, H.L. Muller, W.G. Vree and L.O. Hertzberger 765

Parallel solution of large-scale differential-algebraic systems
R.S. Maier, L.R. Petzold and W. Rath 795


Author Index 823
